

# PLAY DOUGH

## MATERIALS

1 mug plain flour

½ mug salt

2 teaspoons cream of tartar

1 tablespoon oil

1 mug cold water

Place all the ingredients in a saucepan and stir continuously over a low heat until it comes away from the sides and forms a dough that is dry to touch.

You can now add some food colouring, food flavouring extracts or glitter to make your dough extra special.

## MODELLING DOUGH

Combine 1lb self-raising flour with 1lb salt and some water to make a dough. This may be dried in the oven, painted and varnished to make long lasting models and decorations.
